

MOORES ROAD MEDICAL

DEPLOYS NETCONNECT

ACHIEVES INSTANT MOBILITY

## MOORES ROAD MEDICAL

Moores Road Medical had just been established, having acquired a small clinic in Melbourne, Australia. Management wanted to revamp their existing IT infrastructure & **implement a mobile working solution - with a limited budget**. Moores Road Medical turned to NetConnect...

### A MOBILITY PROBLEM

- Doctors required access to their medical practice software and patient files when outside of the practice from their mobile device, in a simple & user-friendly manner independent of the cloud provider selected.
- Nurses & doctors are required to make in-house calls to patients which posed two key problems. Previously, staff had no access outside of the practise to important patient information. Additionally, management also feared the repercussions of the security of this information if mobile devices were lost or stolen.
- Moores Road Medical wanted to deploy a mobility solution in conjunction with a cloud solution to better manage their IT applications, including Best Practice (medical app), MYOB (accounting) & File Storage.
- Management required a cloud-based solution as they didn't want to house sensitive data on-premise, nor outlay significant capital expenditure.

### THE NETCONNECT SOLUTION

## NETCONNECT BENEFITS

### EMBRACE MOBILITY

Doctors & nurses now have access to key resources required to treat patients off-site. NetConnect has enabled Moores Road Medical staff to securely access their line of business applications, including Best Practice & MYOB using their device of choice.

### HIGHLY SECURE DATA

NetConnect comes standard with multiple layers of enterprise-grade security which allows critical data to be accessed securely. No files are ever stored on the mobile devices or outside the secure cloud environment, completely removing the risk of lost or stolen data.

### FLEXIBLE DEPLOYMENT

NetConnect enables a tailored, cloud-based solution, allowing Moores Road Medical to manage their IT applications. The simplicity of the NetConnect solution ensured there was no need for staff retraining & the practice was instantly mobile.

### AFFORDABLE SOLUTION

NetConnect ensures Moores Road Medical never have to outlay significant capital expenditure, enabling the mobility solution on a low-cost, per-user, per-month basis. Practitioners are now able to use their devices of choice for work, removing the need to carry bulky laptops.
