

DESKTOP AS A SERVICE

Built with revolutionary award-winning cloud technology from DATA3 and Parallels RAS.

Application Delivery & DaaS / VDI

DATA3 offers enterprise grade, turnkey DaaS solution that businesses and MSPs can quickly establish **"remote working"** capabilities for their users/clients. **"The D3 Cloud"** offered by DATA3 along with Parallels® Remote Application Server (RAS) is an **all-in-one** virtual desktop infrastructure (VDI) solution that delivers applications and virtual desktops to any device, anytime, anywhere. The solution includes all the required infrastructure and licenses and is designed to provide alternative to Citrix® without all the complexity and costs.

Desktop-as-a-Service: Features And Benefits

1. Instant access to applications, desktops and data from any device, anytime, anywhere
2. Guaranteed reduction in Total Cost of Ownership (TCO)
3. Integrate with existing Active Directory and file servers
4. Enhanced data security
5. Superior user experience
6. Custom branding and permission controls
7. Hosted on "The D3 Cloud" allows for unmatched scalability, performance, reliability and security
8. Hosts multiple environments (VMWare ESXi, Microsoft Hyper-V, Nutanix, Acropolis, Heterogenous Windows environments and Scale Computing HC3)
9. Support for cloud platforms such as Microsoft Azure
10. Turnkey solution - Architected for and deployed for you
11. End-to-End Control - Know exactly where your data is stored

MULTIFACTOR AUTHENTICATION

HYBRID CLOUD ARCHITECTURE

The D3 Cloud And Parallels RAS (Remote Application Server)

Superior User Experience

Provides an intuitive and seamless user experience (UX) on any device, allowing employees to access their workspace wherever they are, in the office or on the go.

- Drag-and-drop functionality
- Multitasking
- Quick keypad
- Full RemoteFX support
- Bidirectional audio
- Branding & Customizing Options
- Effortless printing and scanning
- Ultra-fast login
- Native gestures

Enhanced Data Security

- Advanced filtering
- Enforce client policy
- Client management
- Encryption protocols
- Multifactor Authentication
- SAML SSO
- Control where your data is stored

IT Agility & Business Readiness

- Hypervisor agnostic
- Ready for hyperconverged solutions
- Desktop-based VDI - Server-based VDI
- Session-based VDI
- Mix and match different Heterogenous Windows Server environments
- Multi-Cloud ready

Simple To Deploy & Maintain

- Auto-provisioning / Auto-scaling
- Central management console / Client auto-configuration
- SSL certificate manager / Server management tools
- Wizard-based deployment
- High availability (HALB) & Resource-based load balancing
- Monitoring & reporting
- Granular admin permissions
- PowerShell & REST APIs
- Automated notifications with custom actions

Reduce Total Cost of Ownership

- Easy to deploy, configure & maintain
- No expensive add-ons
- Out-of-the-box VDI delivery, load balancing & multicloud
- Fast learning curve
- Concurrent user model
- All inclusive single Service Provider License Agreement (SPLA)
- Manage sub-licensing
- 24/7 Customer support
